E 150 Project Report Submission Format

- *No handwritten information unless stated in project description*
- Introduction: Explain it to a layman who has never read the project description…
  - Outline the scenario being modeling by this project.
  - Explain the specific goals of the project.
  - Specify the methods that will be explained and the structure of the paper.
- Background and Theory: Brief explanation, key equations, difficulties, assumptions, etc… see project for specific questions to answer as well. This section should ***not*** be limited to the questions outlined in the project
- Procedure and Methods: flow-charts, pseudocode, etc. Explain succinctly the procedure you took to implement the project. See each project for specific points to address.
- Results and Discussion: Figures, plots, and tables with titles, labels, etc. Some interpretation and insight into the results… See each project for specific points to address.
- Conclusion: Briefly summarize your goals, methods, and key results
- Appendix: The messy stuff like code or raw data. Must be referenced in the report. Only place information here if it clarifies your report, but there is too much information to show cleanly in main body of report.
